Gold 2	212	135	197	162	105	18/18	8	32	1.200
Mini Gold 3	172	135	209	122	105	18/18/18	9	36	1.400
Gold 3	212	135	209	162	105	18/18/18	11	48	1.600

One-body structure, solid and compact entirely made of stainless steel.
The standard configuration is made of two or three independent, overlapping baking units of different sizes according to the different productive capability.

The baking units are conceived in such a way that they can work totally independently.
The high quality of the insulation offers the chance to obtain a consistent energy saving, reducing thermal waste.

Electric resistance units are made of an alloy of nickel and chromium and are set on proper frames situated beneath the plane and along the ceiling of the baking boxes.
This particular setting guarantees a more uniform heat diffusion, together with a more effectiveness in the cooking process and the capability of maintaining the temperature.

Internal lighting thanks to 12v halogen lamps protected by double tempered crystal.

Independent electric control boards for each baking box with a diffusers to regulate heat distribution separately between oven roof and floor.

Front flap opening with ergonomic handles (models Special Pb and Gold). Vertical opening with a rack handle device (models Special Pc and MaxiPizza). Tempered glass to allow a perfect visibility of the inside part of the cooking boxes.

All devices, switches and the equipment are placed in order to facilitate the manoeuvrability, the cleaning process and the maintenance in absolute safety in conformity with current regulations.
